

dimensions in mm

Test procedure: continuity from each pin of P1 to equivalent pin of P2

| Wiring from P1 to P2 |    |   |
|----------------------|----|---|
| P1                   | P2 | Signal name from peripheral's perspective |
| 1                    | 1  | VS_3V3                                    |
| 2                    | 2  | 5VEN                                      |
| 3                    | 3  | SI  |
| 4                    | 4  | EXT                                       |
| 5                    | 5  | 0V  |
| 6                    | 6  | SDI                                       |
| 7                    | 7  | nCS                                       |
| 8                    | 8  | SCK                                       |
| 9                    | 9  | SDO                                       |
| 10                   | 10 | nRST                                      |
