# **MORNSUN<sup>®</sup>**

# US23861 EN23651

## **FEATURES**

- Universal 90 264VAC or 127 370VDC input voltage
- Operating ambient temperature range: -40 $^{\circ}$ C to +70 $^{\circ}$ C
- Built-in active PFC function
- Output short circuit, over-current, over-voltage protection, over-temperature protection
- 320W with air cooling, 550W with 25CFM
- 5VDC standby output, 12VDC fan supply
- PG signal and remote sensing function
- Safety according to medical certification, suitable for BF application
- The base plate with conformal coating
- Operating altitude up to 5000m

LOF550-20Bxx-C(-CF) series is one of Mornsun's enclosed AC-DC switching power supply and suitable for all kinds of BF type (be accessible to patients) medical system equipment. It features universal AC input and at the same time accepts DC input voltage, cost-effective, low no load power consumption, high efficiency, high reliability and double or reinforced insulation. These converters offer excellent EMC performance and meet IEC/EN61000、IEC/UL/EN62368、GB4943、EN60335、IEC/EN61558、IEC/EN/ES60601 standards and they are widely used in areas of industrial, LED, street light control, electricity, security, telecommunications, smart home, etc.

Notes: 1.\*Under any conditions, the total power of the product should not exceed the rated power. When the output voltage is increased, the total output power cannot exceed the rated output power, when the output voltage is decreased, the output current cannot exceed the rated output current; 2.\*When measuring the full load efficiency, the fan should be connected to an external power supply. Fan loss is not included in the input power; 3.\*LOF open frame series is also available, named LOF550-20Bxx ;

4.\*25CFM refers to LOF550-208xx-C series external fan speed, fored air cooling 25CFM refers to the built-in fan speed, which automatically starts when the LOF550-208xx-CF series are turned on.

#### LOF550-20Bxx-CF Series

Remote sensing function wiring diagram

#### Note:

1.RS - and RS + cannot be shorted or reversed, otherwise the power module will be damaged;

2. The remote compensation function can compensate the voltage drop on the output cable, which includes the sum of the cable drop connected to the output positive terminal and the output negative terminal;

3. If you need to use remote compensation function, the signal pin needs to be connected with the load and with a twisted pair.

MORNSUN Guangzhou Science & Technology Co., Ltd.

#### Note:

- 1. For additional information on Product Packaging please refer to <u>www.mornsun-power.com</u>. Packaging bag number: 58220219 (LOF550-20Bxx-C); 58220220 (LOF550-20Bxx-CF);
- 2. Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75%RH with nominal input voltage and rated output load;
- 3. All index testing methods in this datasheet are based on our company corporate standards;
- 4. In order to improve the efficiency, there will be audible noise generated when working at light load, but it does not affect product performance and reliability;
- 5. We can provide product customization service, please contact our technicians directly for specific information;
- 6. Products are related to laws and regulations: see "Features" and "EMC";
- 7. The out case needs to be connected to PE (-) of system when the terminal equipment in operating;
- 8. CAUTION: Double pole, neutral fusing. Disconnect mains before servicing."/"ATTENTION: Double pôle/fusible sur le neutre. Débrancher lalimentation avant lentretien;
- 9. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units;
- 10. The power supply is considered a component which will be installed into a terminal equipment. All EMC tests should be confirmed with the final equipment. Please consult our FAE for EMC test operation instructions.
